I would like to introduce TWO Coffee Salvadoran Companies **BONKAFFEE** and **COEX** who I am looking for Dutch partners for them.

COEX

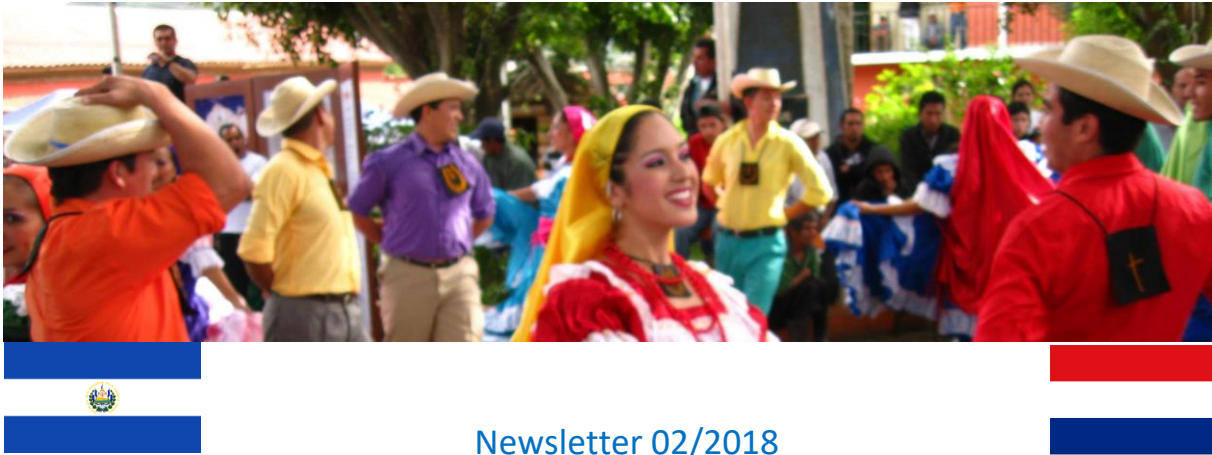

Brochure available

BONKAFFEE

Our coffee is harvested by hand, one coffee cherry at a time. Generally three or four passes (or "cuts") are made during the harvest season (which runs from November to March). In November, the slowly maturing green cherries begin to redden. Only a few of each plant's many cherries ripen at the same time, so it is necessary to pick selectively and return time and again to the same plant. This is a very labour-intensive process and one of the most important parts in producing a high quality coffee. Our coffee quantity depends on the cyclic year and climate changes. We program to offer world wide 2,500 Bags 69 kg. per year.
